Volume II

He who loses sight loses his view of the universe, and is like one interred alive who can still move about and breathe in his grave.

Do you not see that the eye encompasses the beauty of the whole world? It is the master of astronomy, it assists and directs all the arts of man. It sends men forth to all the corners of the earth. It reigns over the various departments of mathematics, and all its sciences are the most infallible.

It has measured the distance and the size of the stars; has discovered the elements and the nature thereof and from the courses of the constellations it has enabled us to predict things to come. It has created architecture and perspective, and lastly, the divine art of painting.

All knowledge has its origins in our perception. I say that the azure that the air makes us see is not its proper color, but this color comes from warm, damp air, evaporated into miniscule and imperceptible particles, which, being struck by the light of the sun, become luminous below the obscurity of the mighty darkness which covers

Stephens Instruments manufactures and distributes one of the largest selections of microsurgical instruments for Ophthalmology. We offer a complete line of stainless steel and titanium surgical instrumentation as well as a complete line of disposable knives. Our product range has been broadened to include products that have been developed through your experiences and advancements in technology. Stephens Instruments offers a repair service for all brands of ophthalmic surgical instruments. We are also at your service for any new ideas for instrumentation or modifications to existing instruments.

Stephens Instruments manufactures its instruments utilizing the highest quality of German and U.S. stainless steel. All instruments are guaranteed against defects in material and/or workmanship.

Illustrations in this catalogue generally represent actual size of instruments. Stephens Instruments reserves the right to make necessary changes to design, size, etc., as is required.

All reusable instruments that are returned in unused condition within 30 days of invoice date will be fully refunded for any reason. Disposable, sterile instruments that have been opened may not be returned for a refund.

We look forward to the opportunity to serve you.

Style Number	Dimensions		Instruments Per Tray
	Inches	Centimeters	
T1-0001	6.0 x 2.5 x 0.75	15.2 x 6.3 x 1.9	1
T1-0002	7.5 x 2.5 x 0.75	19.0 x 6.3 x 1.9	3
T1-0003	6.5 x 4.0 x 0.7	16.5 x 10.1 x 1.9	3
T1-0004	7.5 x 4.0 x 0.7	19.0 x 10.1 x 1.9	10
T1-0005	10.0 x 6.0 x 0.7	25.4 x 15.2 x 1.9	20
T1-0007*	6.0 x 2.0 x 0.7	15.2 x 5.1 x 1.8	1

Dimensions are denoted as L x W x D and are tabulated by mat dimensions. The number of instruments per tray is approximate and will vary with the size of the instruments. *With silicone bars.

Stephens Trial Case

Set of trial lenses worked to a high standard of accuracy to meet the quality requirement of the most demanding practitioner. The lenses are of the plano form, back vertex power, 20mm aperture, spun into aluminum mounts of 38mm diameter. The plus and minus mounts are anodized in different colors. Trial frame sold separately.

The Senior Set

Contents:

Spheres - 32 Pairs Each CX & CC 0.12 to 20.00

Cylinders - 20 Pairs Each CX & CC 0.12 to 6.00

Prisms - 10 Nos 1/2, 1, 2, 3, 4, 5, 6, 8, 10, 12

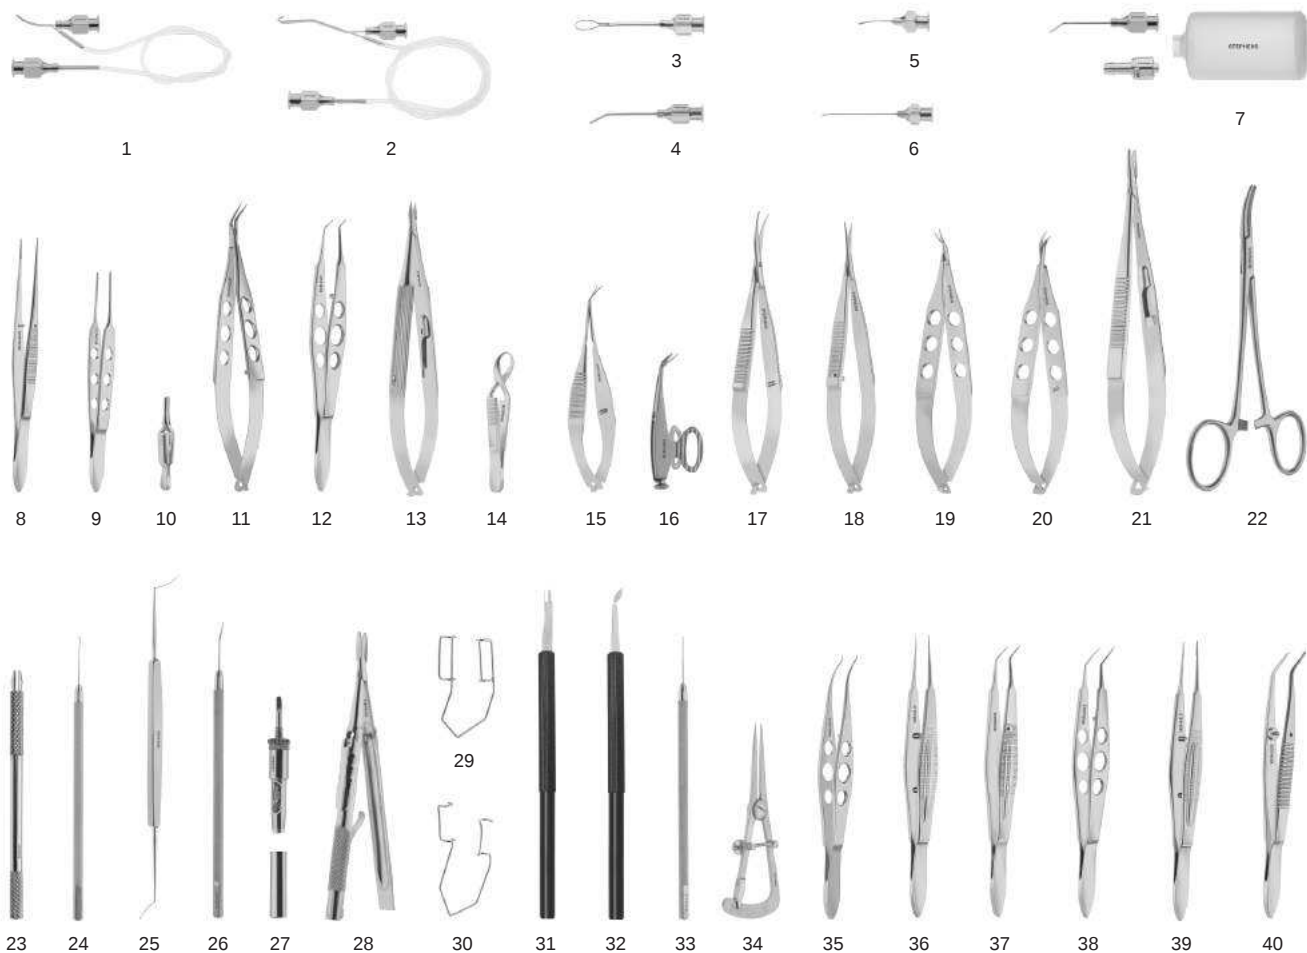

TC-1005

Adjustable Trial Frame

Light-weight aluminum body and stainless steel sides. Holds 8 reduced aperture lenses and permits smooth and easy manipulation of bridge and P.D. adjustment.

SCISSORS, VANAS 11 MM BLADES

He who loses sight loses his view of the universe, and is like one interred alive who can still move about and breathe in his grave.

Do you not see that the eye encompasses the beauty of the whole world? It is the master of astronomy, it assists and directs all the arts of man. It sends men forth to all the corners of the earth, and the depths of the sea, and the most infatigable.

It has measured the distance of the stars, and the nature thereof and from the courses

of the constellations it has enabled us to detect the beginning and the end of the world, and the art of painting.

All knowledge has its origins in our perception. I say the eye does not see its proper color, but this color comes from warm, damp air, evaporated into miniscule and imperceptible particles, which, being struck by the light of the sun, become luminous below the obscurity of the mighty darkness which covers

2500 Sandersville Road, Lexington, KY 40511 USA
